SUMMARY

DevOps / Cloud Infrastructure Engineer with 3 years of experience managing Kubernetes-based production environments and supporting cloud-native applications on AWS. Proficient in Kubernetes, Docker, Jenkins, GitHub Actions, Terraform, and Argo CD for CI/CD automation and GitOps-driven deployments. Experienced in AWS EKS administration, Infrastructure as Code (IaC), production deployments, incident management, and monitoring using Prometheus and Grafana. Skilled in maintaining highly available application environments, troubleshooting production issues, and ensuring reliable software delivery.

SKILLS

Cloud Platforms: AWS (EC2, IAM, VPC, EKS, ECR, S3, ALB, NLB, Route 53, CloudWatch, Auto Scaling)

Containerization & Orchestration: Kubernetes, Docker, Helm

Kubernetes Concepts: Deployments, Services, ConfigMaps, Secrets, Ingress, Persistent Volumes, Horizontal Pod Autoscaler (HPA), RBAC, Taints & Tolerations, Node Affinity

Infrastructure as Code: Terraform

CI/CD & GitOps: Jenkins, GitHub Actions, Argo CD

Monitoring & Observability: Prometheus, Grafana, Alert manager

Version Control & Collaboration: Git, GitHub, Jira

Scripting & Configuration: Shell Scripting, Python, YAML

Operating Systems: Linux (Amazon Linux, Ubuntu)

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad - *Cloud Infrastructure Engineer*

Technologies: Kubernetes, Docker, Prometheus, Grafana, Jenkins, Linux, Git, Terraform

-
- Worked on a production-grade AWS EKS cloud-native microservices application, managing Kubernetes workloads to ensure high availability, scalability, and efficient resource utilization across environments.
 - Provisioned and maintained AWS infrastructure using Terraform, implementing Infrastructure as Code (IaC) practices to automate and standardize cloud resource management.
 - Designed, maintained, and optimized CI/CD workflows using Jenkins and GitHub Actions, enabling automated application builds, testing, and production deployments.
 - Managed Kubernetes resources including Deployments, Services, ConfigMaps, Secrets, Ingress, Persistent Volumes, and Horizontal Pod Autoscaling (HPA) to support containerized application workloads.
 - Implemented GitOps-based deployment strategies using Argo CD, maintaining deployment consistency and streamlining application delivery across Kubernetes environments.
 - Monitored application and infrastructure performance using Prometheus and Grafana, proactively identifying issues, supporting incident resolution, and improving platform reliability.
 - Participated in production deployment, release management, and troubleshooting activities, resolving application and infrastructure issues while collaborating with development teams to maintain stable and highly available services.

EDUCATION

Bachelor Of Engineering - *Mechanical Engineering*

Raghu Engineering College | 2019 - 2022

AWARDS

Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.

Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

IBM Applied DevOps Engineering

Issued Feb-2026

Azure Administrator Associate

Issued July 2023
